The feedback from key stakeholders isn't great – they're not being kept up to date with what's going on or worse, getting too much, often irrelevant, information.

It's not the project work that's the problem, it's the day to day delivery. Our internal customers could be better engaged.

You need your people to be able to influence stakeholders more effectively – so that you're not involved in every conversation.

"I've come away with new tools and techniques to practice to enhance my development in my career, thank you."

Training Lead,
Global Electronics
Distributor

Stakeholder Engagement
